1900 ASTORIA VOTER REGISTRATION

Sorted by Name, Address, Occupation, Birthplace and Precinct/Birthplace

Prepared by Bruce Berney
April 1999

The first section of the complete binder, given to Clatsop County Historical Society, lists the information just as I copied them from a photocopy of the original supplied to me by Liisa Penner, editor of *Cumtux*. For each of Astoria's then seven precincts, the 1,655 names are entered in the order that the individual came to the county clerk's office to register.

I then sorted and printed by name for the benefit of genealogists; then by address for those interested in finding the history of their house; then by occupation for the curious; and finally by place of birth for sociologists wondering why there's a Midsummer Festival in Astoria.

Bear in mind that this is a "fraternity" list. No women voted in 1900. Also, it's interesting to note that these registrations took place in the old white wooden court house built about 1855, pictured on the centerfold of *Cumtux*, Fall 1997. We're lucky this list has survived.

Asterisks

An asterisk generally means that the information in the original document was either blank or illegible, or otherwise in my opinion not useful. It is an invitation for the interested user to go to the Clatsop County clerk's office and ask the Records Clerk to show you the original. You can then try to figure the penmanship out for yourself.

Name

As usual, if you are looking for a name, don't assume that it is spelled right in this document. (a) Sometimes I make errors; (b) The county clerk would write the registrant's name as he heard it or as he saw it on naturalization papers. Sometimes the registrant's signature is different. When in doubt, I usually used the clerk's spelling, but sometimes I was persuaded that the registrant knew how to spell his own name even if he couldn't pronounce it right. Brackets enclosing an X, [x] indicate people who couldn't write their names. In the "Remarks" column, which I did not copy, it is usually explained that the person is illiterate or has defective eyesight, then would describe the person, such as: 5'6", gray hair, brown eyes, tattoo of anchor on left arm. Sometimes, "Can read, but nervous today."

Address

An asterisk in the address column means that there is additional information, such as the room number of an apartment or hotel or details like: West side, downstairs". If there is only an asterisk in that column, it means that I didn't feel the address would be useful to people doing house histories because of the lack of house numbers, such as SW Corner of 12th & Duane, which I assumed was burned in the 1922 fire, or 7-67-84, "First house west of Scandinavian Cannery mess house." I was fascinated that 42 voters lived on scows, 18 lived at a boarding house at 103 Suomi Street, wherever that was!

Occupations

If you are interested in counting occupations, bear in mind that some words may mean several different things. *Engineer*, for instance might be the driver of a horse drawn fire engine, run a train or boat, or design wooden streets. *Agent* also could be several things. Also look for similar meanings, such as 25 bartenders and 20 saloonkeepers. Also, *boatman* and *seaman* are similar. Bear in mind that there may have been many more of any one occupation who couldn't, or didn't vote.

Some abbreviations worth mentioning: cl = clerk; contr = contractor; crp = carpenter; f = fishermen; lab = laborer; m = merchant; rr = railroad; team = teamster

Birthplace (Born)

In the beginning of the year, the U.S. state was recorded. After a couple months, unfortunately, the clerk wrote only, "American". Blast him, anyway!

Abbreviations: a = American; aus'li = Australia; aust = Austria and Yugoslavia; bava = Bavaria; belg = Belgium; berm = Bermuda; d = Denmark; eng = England; ENG = Great Britain ; f = Finland; fr = France; g = Germany; gre = Greece; ire = Ireland; n = Norway; prus = Prussia; s = Sweden; sco = Scotland; swi = Switzerland; others are obvious.

The count: America, 765; Australia, 2; Austria & Yugoslavia, 37; Bavaria, 1; Belgium, 4; Bermuda, 1; Canada, 45 (incl. 8 Nova Sotians); Chile, 1; Denmark, 34; England, 54; Finland, 259; France, 4; Germany, 93; Holland, 1; Hungary, 2; Iceland, 1; Ireland, 39; Italy, 19; Norway, 109; Prussia, 3; Russia, 11; Sweden, 133; Scotland 14; Switzerland, 13; Turkey, 2.

The date, place, and court (circuit, county, district, etc.) of naturalization or declaration of intent is given in the respective columns. Genealogists wishing for photocopies of documents need to mention these details in requests. I didn't copy them not only because of space and time, but because I think genealogists should see the original registration book at the county clerk's office for themselves.

Precinct / Birthplace (Born)

Finally, I sorted Birthplace, then Precinct. This shows the nationalities who are voters by precinct, and voting place. I thought this was interesting: (Please accept my apology if I left out your favorite ethnic group!)

<u>Precinct</u>	<u>Americans</u>	<u>Finns</u>	<u>All Others</u>	<u>Total</u>	
1 Suomi Hall	18	161	48	227	Uniontown/Smith Point
2 203 Astor St	143	16	88	247	Bond St. Hill/Youngs Bay
3 Court House	144	7	92	243	West Central
4 Fire Hse #2	180	5	96	281	Central
5 Welch Block	189	4	93	286	East Central
6 Fire Hse #3	48	64	104	216	Uppertown
7 Old Adair Sch	<u>42</u>	<u>6</u>	<u>109</u>	<u>157</u>	Alderbrook
	764	260*	668	1,657	

Age

I didn't do a printout for age because I don't know who would use it. It is interesting to know that there were 40 twenty-one year olds registered. The Gray Panthers hadn't hit Astoria yet; there were only 27 in their seventies and only 2 in their eighties who were registered voters.

Further Research

* Figures above and below have a margin of error. Don't quote without counting for yourself.

I am giving a floppy disk (Microsoft Works 3.0, Macintosh) in the CCHS binder when I finish the county voter register. (If they can't use it on their computer, I can possibly be approached to help researchers.) The order in which sorts are made can make some information easy to find. For instance, I sorted Occupations before Birthplace. On page 20 of "Born", you'll see that the first Finn listed is a baker, and the rest of the occupations follow in alphabetical order. It may interest you that of 260 Finns there were five bartenders, while of only 93 Germans, there were also five bartenders. Or, you can find that of 260 Finns, 165 were fishermen.
